Summary

Final-year B.Tech CSE student with hands-on ML and GenAI experience: classification, NLP, model explainability, and deploying models as REST APIs, plus LLM agents built with LangGraph. 3 internships (SAA Technologies, PM Accelerator, Stellar), IEEE-published researcher.

Technical Skills

Languages: Python, C++, SQL, JavaScript, TypeScript, HTML/CSS
AI/ML & Data: Scikit-learn, XGBoost, TensorFlow, PyTorch, OpenCV, NumPy, Pandas, NLP (TF-IDF), SHAP, SMOTE, Feature Engineering, Model Evaluation, Streamlit
GenAI & LLM: LangGraph Multi-Agent Orchestration, LangChain, RAG, LLM Tool-Calling, Prompt Chaining, Groq API, Tavily API
Web & Cloud: FastAPI, Flask, React, Node.js, Supabase, PostgreSQL, MongoDB, REST APIs, AWS, Docker, Git
Blockchain: Stellar, Soroban SDK, Smart Contracts
Methodologies: Agile, CI/CD, Microservices, OOP, TDD

Work Experience

Full Stack Software Engineer Intern Oct 2026 – Present
SAA Technologies

- Building Spreezy, an e-commerce app, as a full stack engineer with React, TypeScript, FastAPI, and Supabase: developing front-end features, REST APIs, and database migrations with automated tests.

AI Engineer Intern – Full Stack Aug 2026 – Oct 2026
PM Accelerator, Cohort 10 [Certificate]

- Built AI recipe-chat workflows that turn natural-language goals into shopping lists, plus purchase-history logic that prefills item details and suggests restocks; contributed to 20+ FastAPI endpoints, 19 Supabase/PostgreSQL migrations, and React/TypeScript search and editing features, backed by 550+ tests at a 98% pass rate.

Stellar Blockchain Developer – Belt Progression Program April 2026 – May 2026
Rise In — Stellar Development Foundation [Certificate]

- Cleared five belt levels, building 5+ Stellar dApps and Soroban smart contracts on testnet/mainnet.

Projects

Autonomous Research and Report Agent *LangGraph, Groq/Tavily API, FastAPI, Streamlit* [Live Demo]

- Built a multi-agent LangGraph pipeline (Research → Fact-check → Write → Critique) with a self-revision loop over Groq LLMs and Tavily search; served via FastAPI, Dockerized, deployed on Render and Hugging Face.

AI Resume Analyzer *Python, NLP, TF-IDF, Flask, GitHub Actions* [Live Demo]

- Built an NLP resume scorer that uses TF-IDF vectorization to match resumes against job descriptions and return an ATS-style score; served through a Flask REST API with GitHub Actions CI/CD.

Loan Default Prediction *XGBoost, SMOTE, SHAP, Flask, Scikit-learn* [Live Demo]

- Built an XGBoost loan-default classifier (94% accuracy), handling class imbalance with SMOTE and explaining each prediction with SHAP; deployed as a Flask REST API with a Streamlit demo.

Certifications

- NPTEL – Python for Data Science
- NPTEL – Technical Communication for Engineers
- GenAI Virtual Internship
- AlgoUniversity – Graph Theory
- Blockchain Technology Virtual Internship

Education

University of Engineering & Management (UEM), Jaipur Aug 2023 – May 2027
B.Tech, Computer Science & Engineering — CGPA: 9.19/10.0
Coursework: Machine Learning, Data Structures & Algorithms, Generative AI, DBMS, Operating Systems, CN

Extracurricular Activities

- **Technical Head – Codesta Coding Club**, UEMJ: Directed 15+ AI/ML workshops, upskilled 1,500+ students.
- **Winner – Esya'23 (NexTech'23)**, IIIT Delhi [Certificate]
- **Winner – Iomatic (Technex'25)**, IIT BHU [Certificate]
- **Runner-up – Makers Carnival Hackathon**: Ranked Top 2 among 300+ participants.
- **First-Author – IEEE Xplore**: Intelligent Accident Detection using FPGA.
